

NOVA A Practical Method for Creating Notebook-Ready Visual Analytics

Jay Wang David Munechika Seongmin Lee Polo Chau

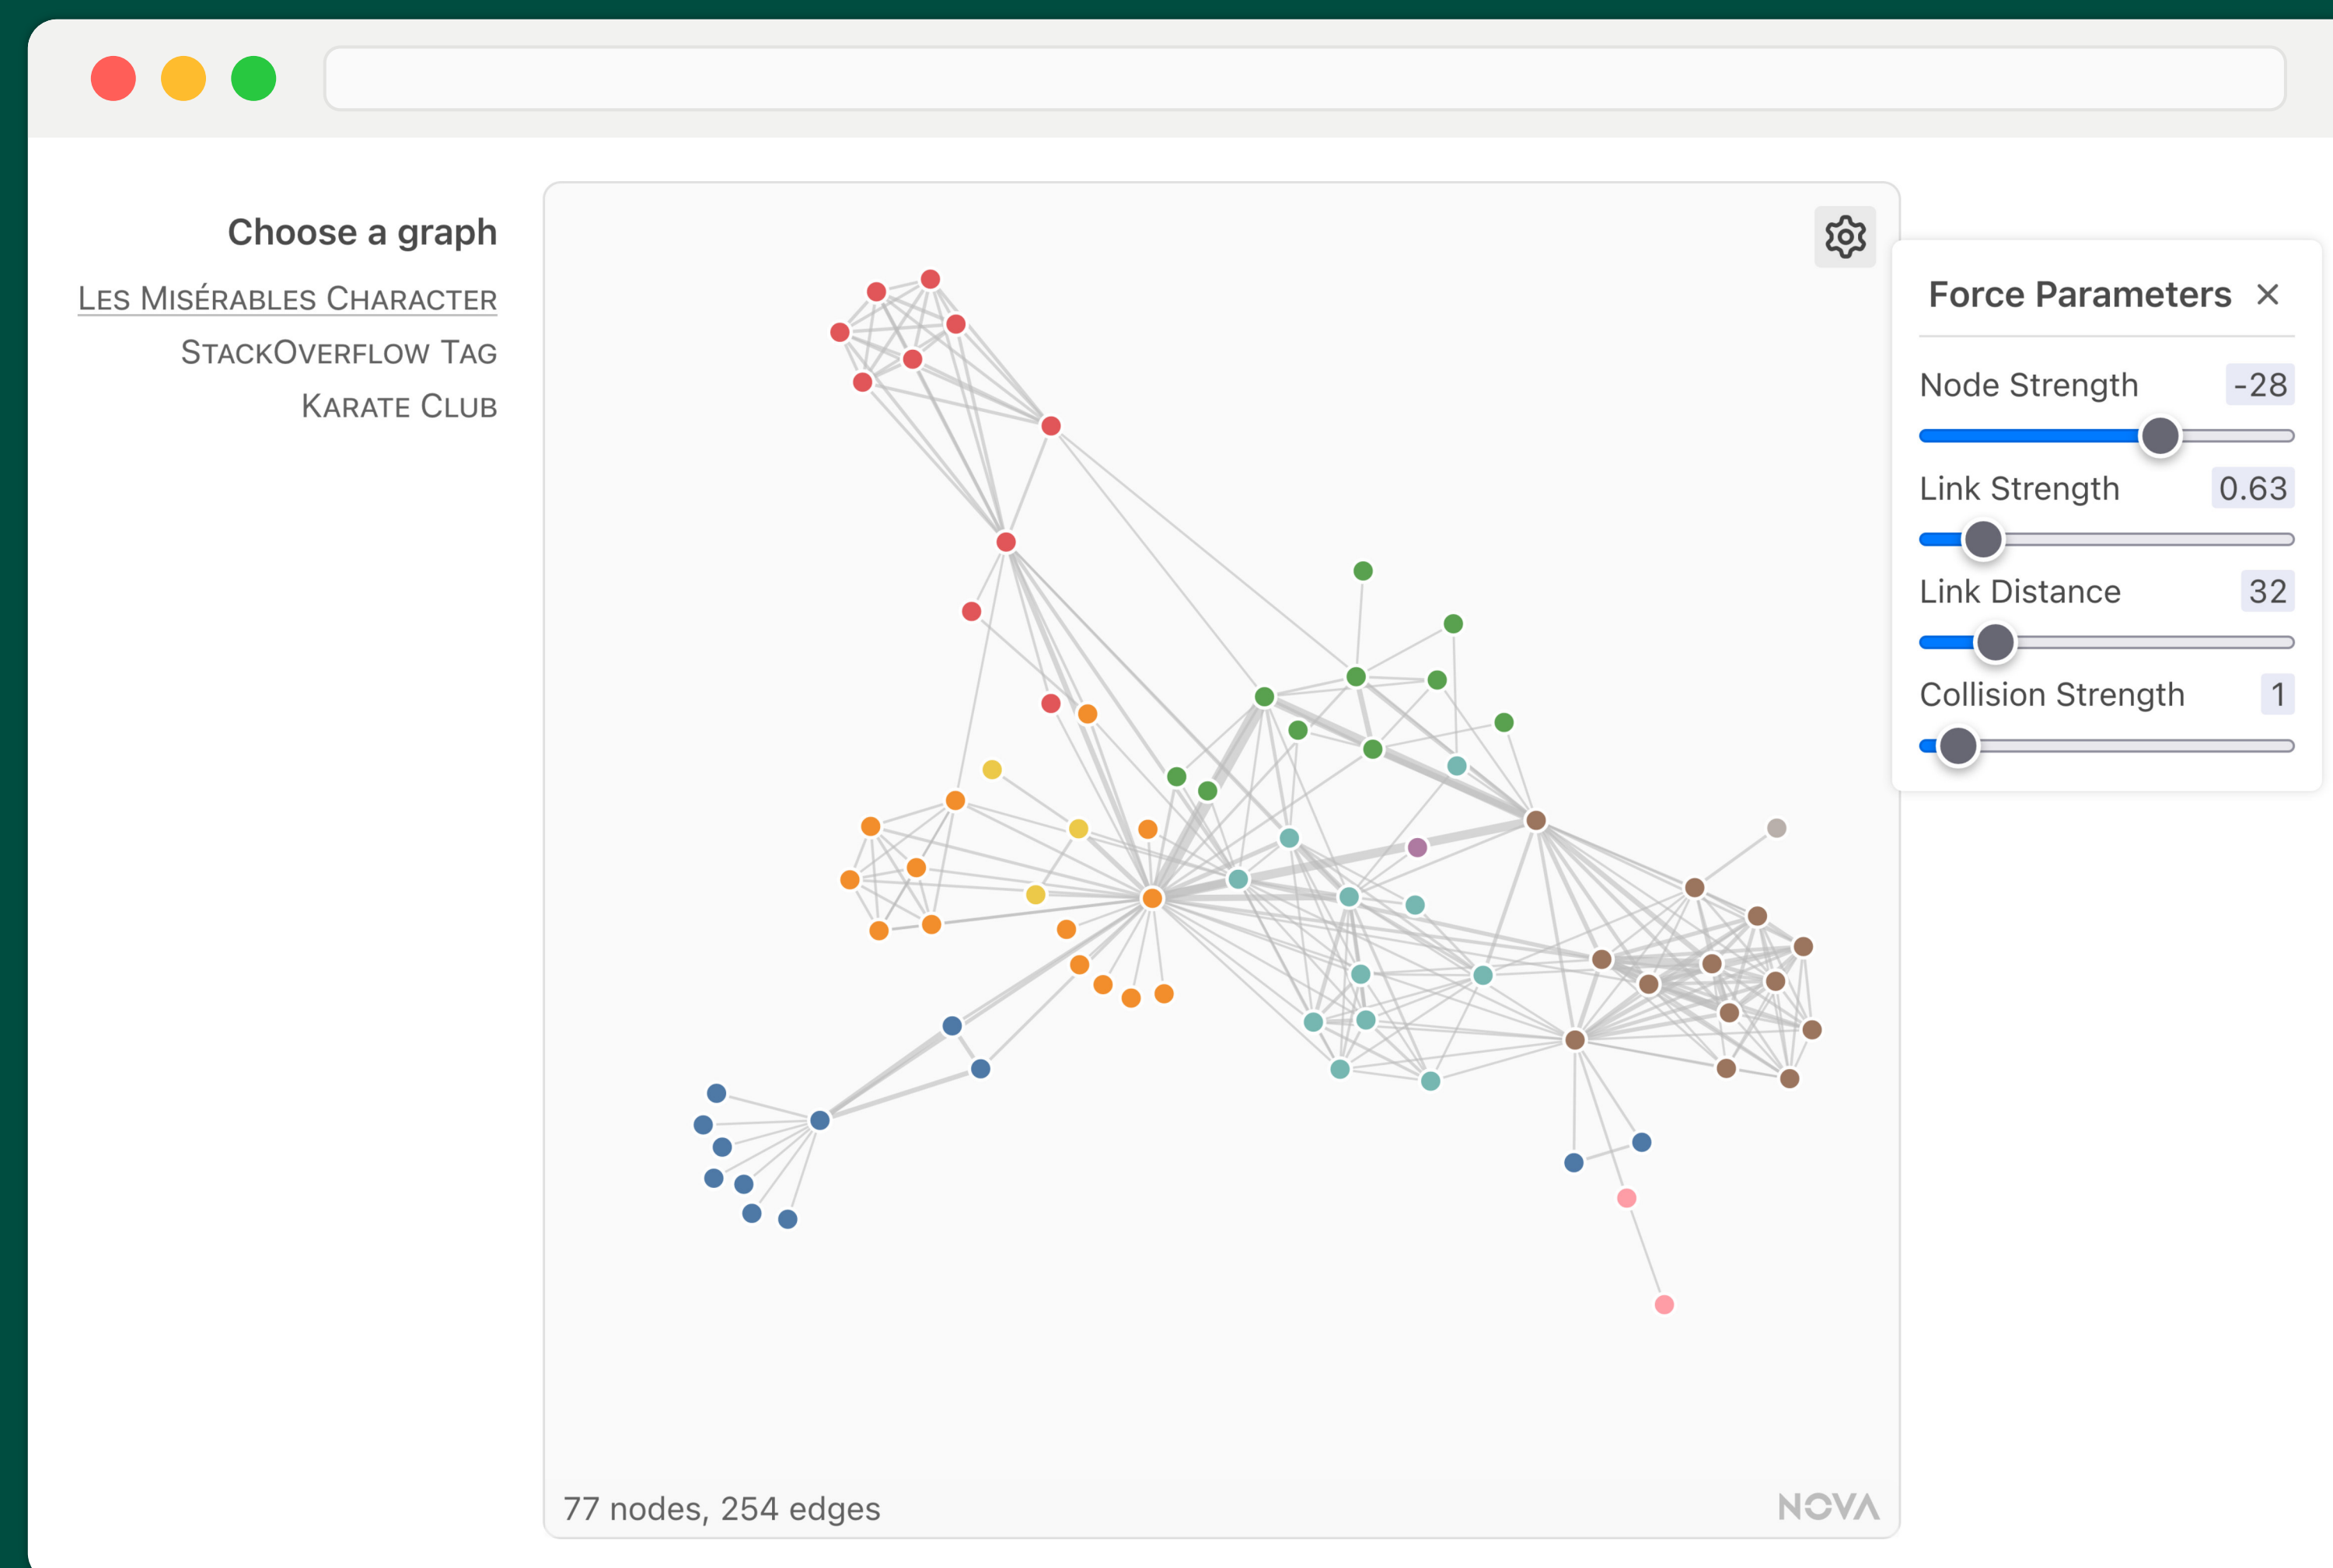

How to create visual analytics tools that more people will use?

SIMPLE AS 1-2-3

- 1 Convert to an HTML**
Bundle scripts, styles, markups
- 2 Design wrapper API**
Pass data to notebook widgets
- 3 Publish to repository**
Release the package on PyPI

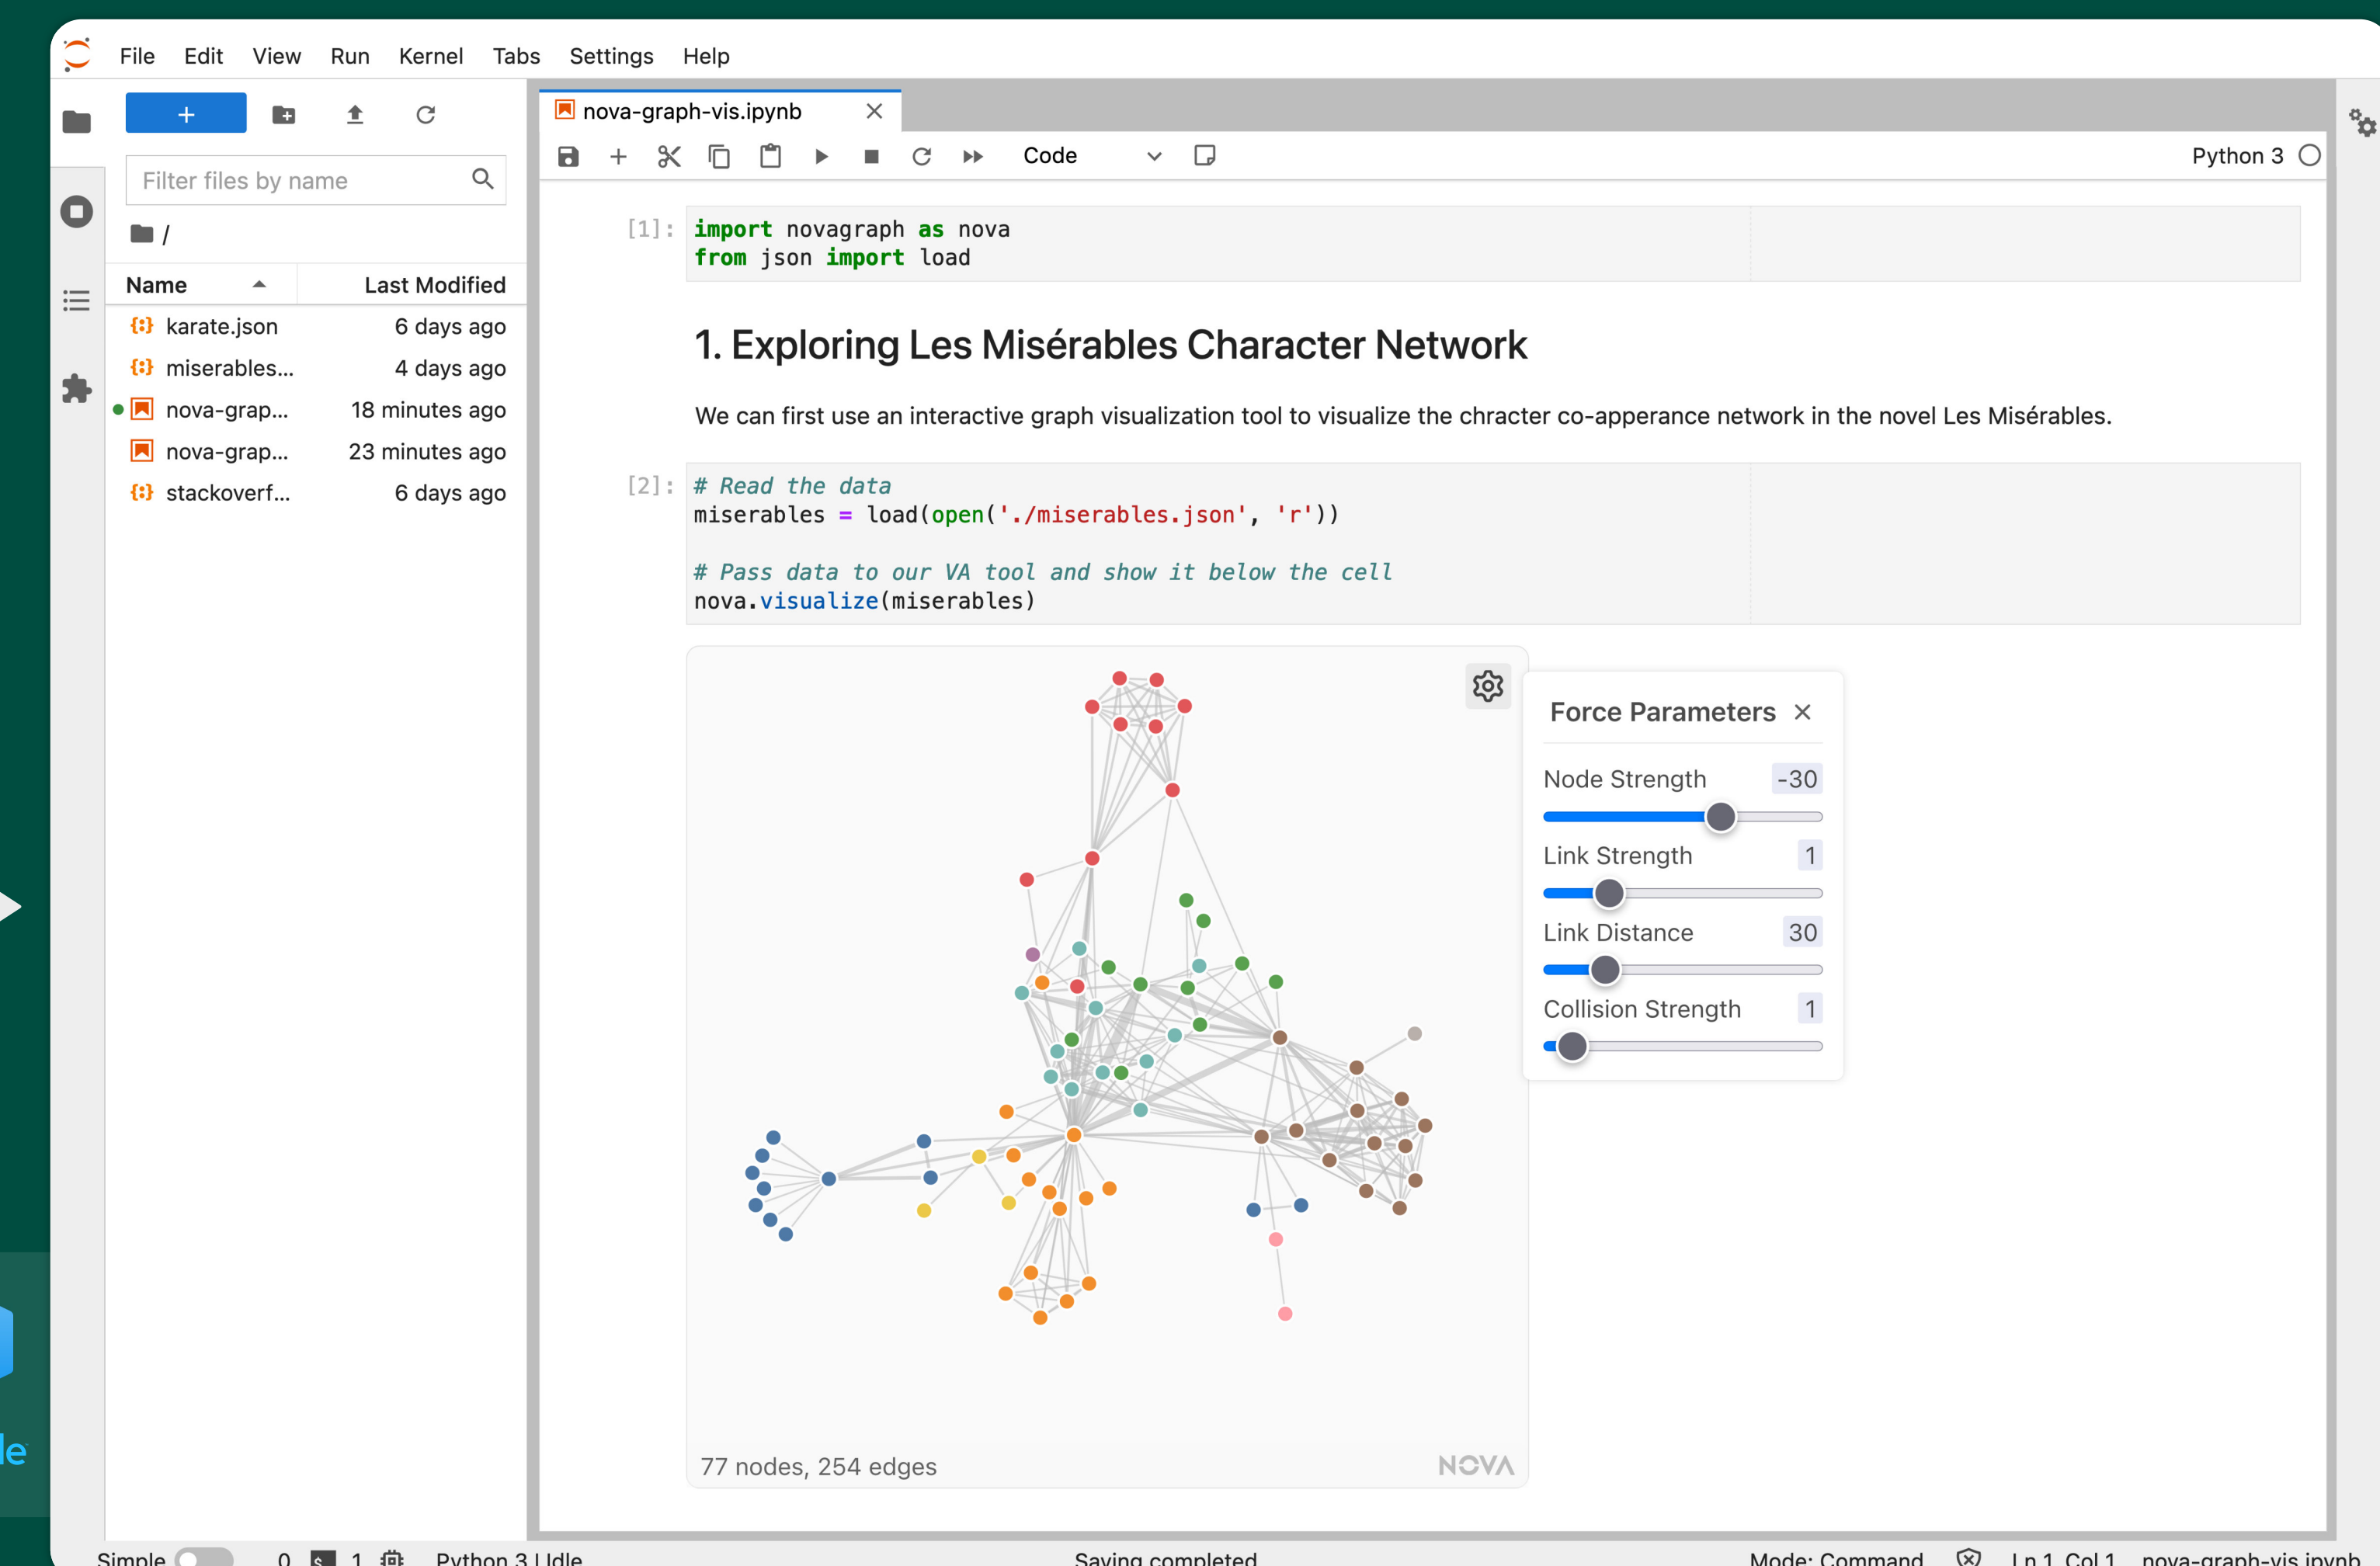

Easy-to-adopt VA tools

A Visual Analytics (VA) Web App

NOVA

B Computational Notebook Widget

GETTING STARTED

Demo in **three** dev stacks
Three implementations of a VA tool and we show how to apply NOVA on each

Try it now!

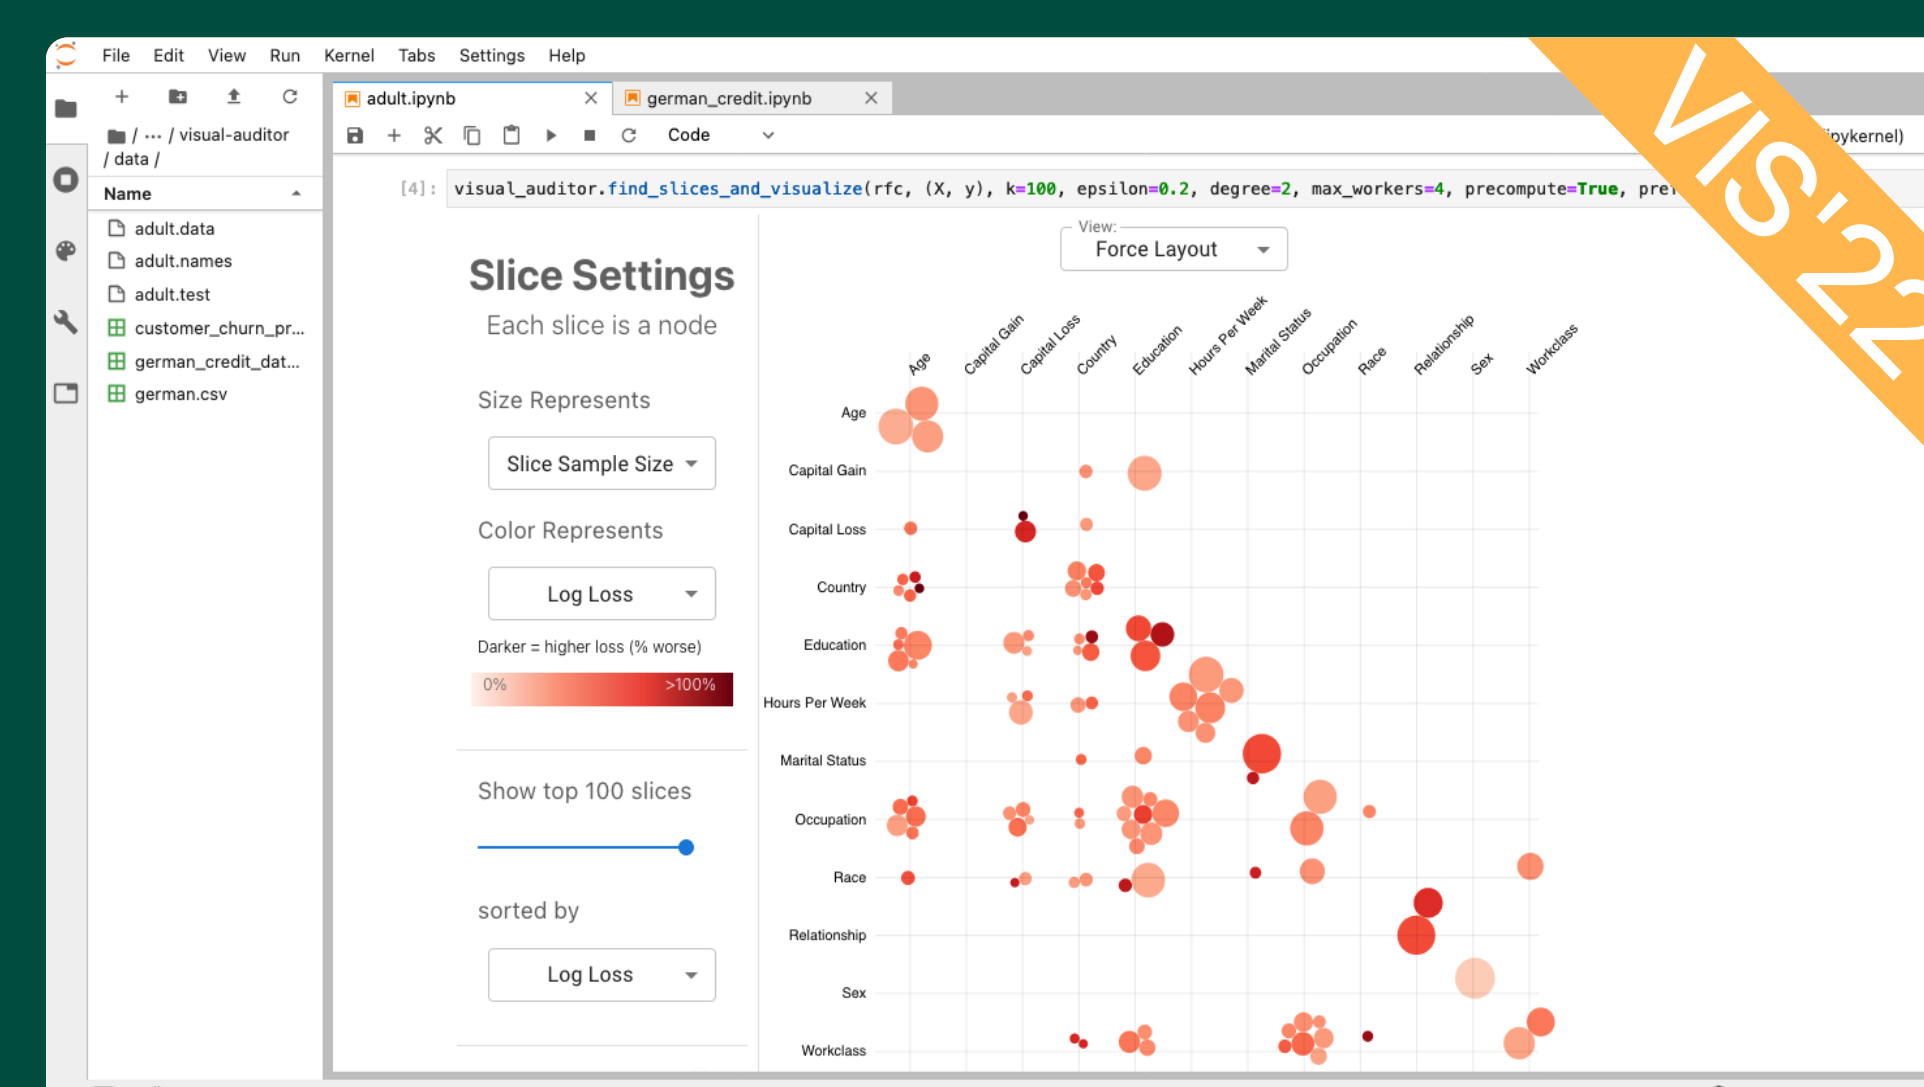

JS Vanilla JavaScript

React + JavaScript

Svelte + TypeScript

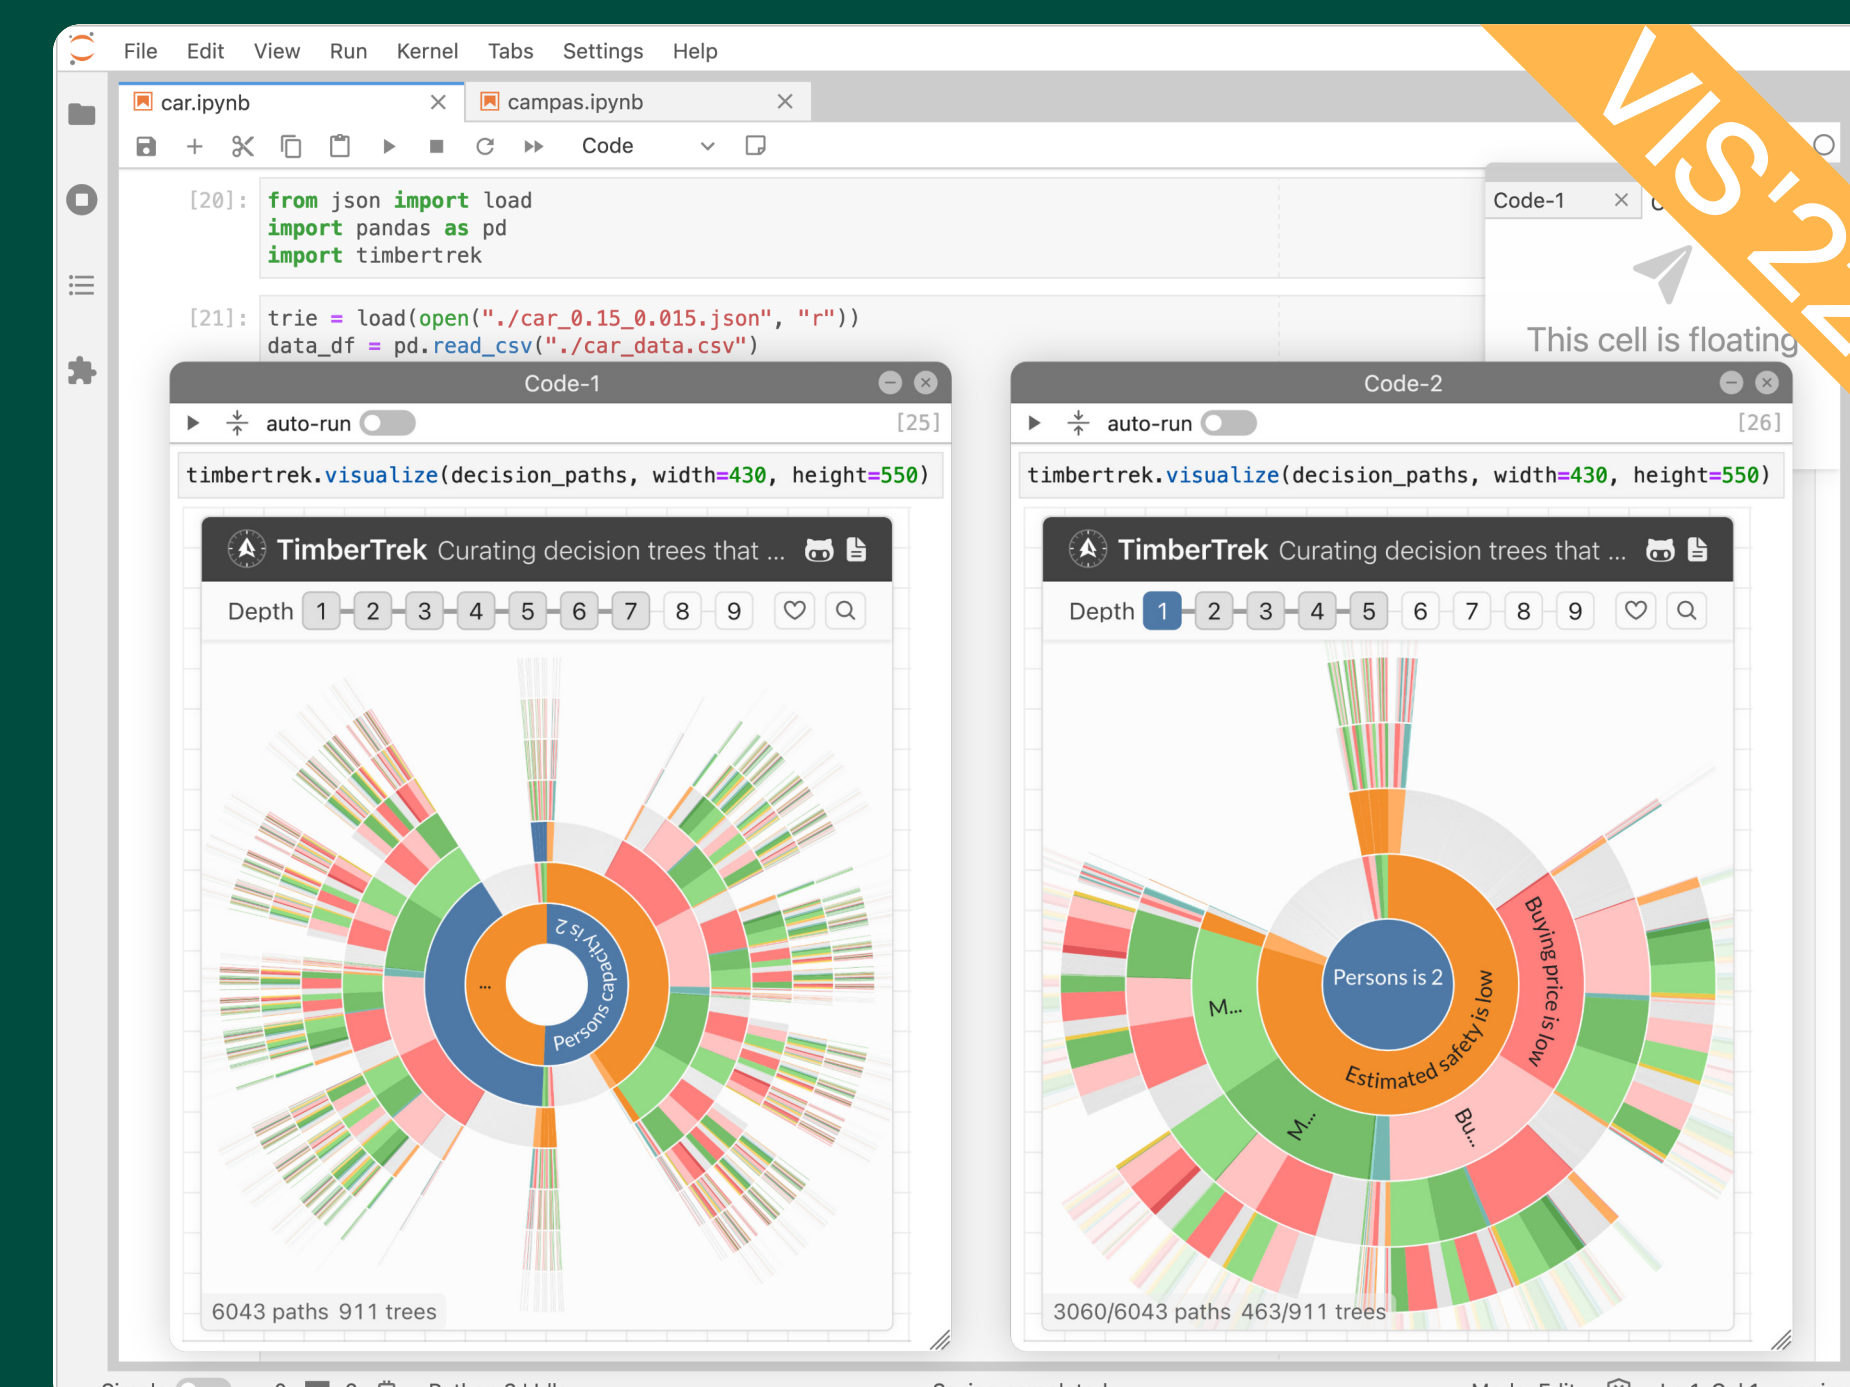

NOVA IN ACTION

Visual Auditor

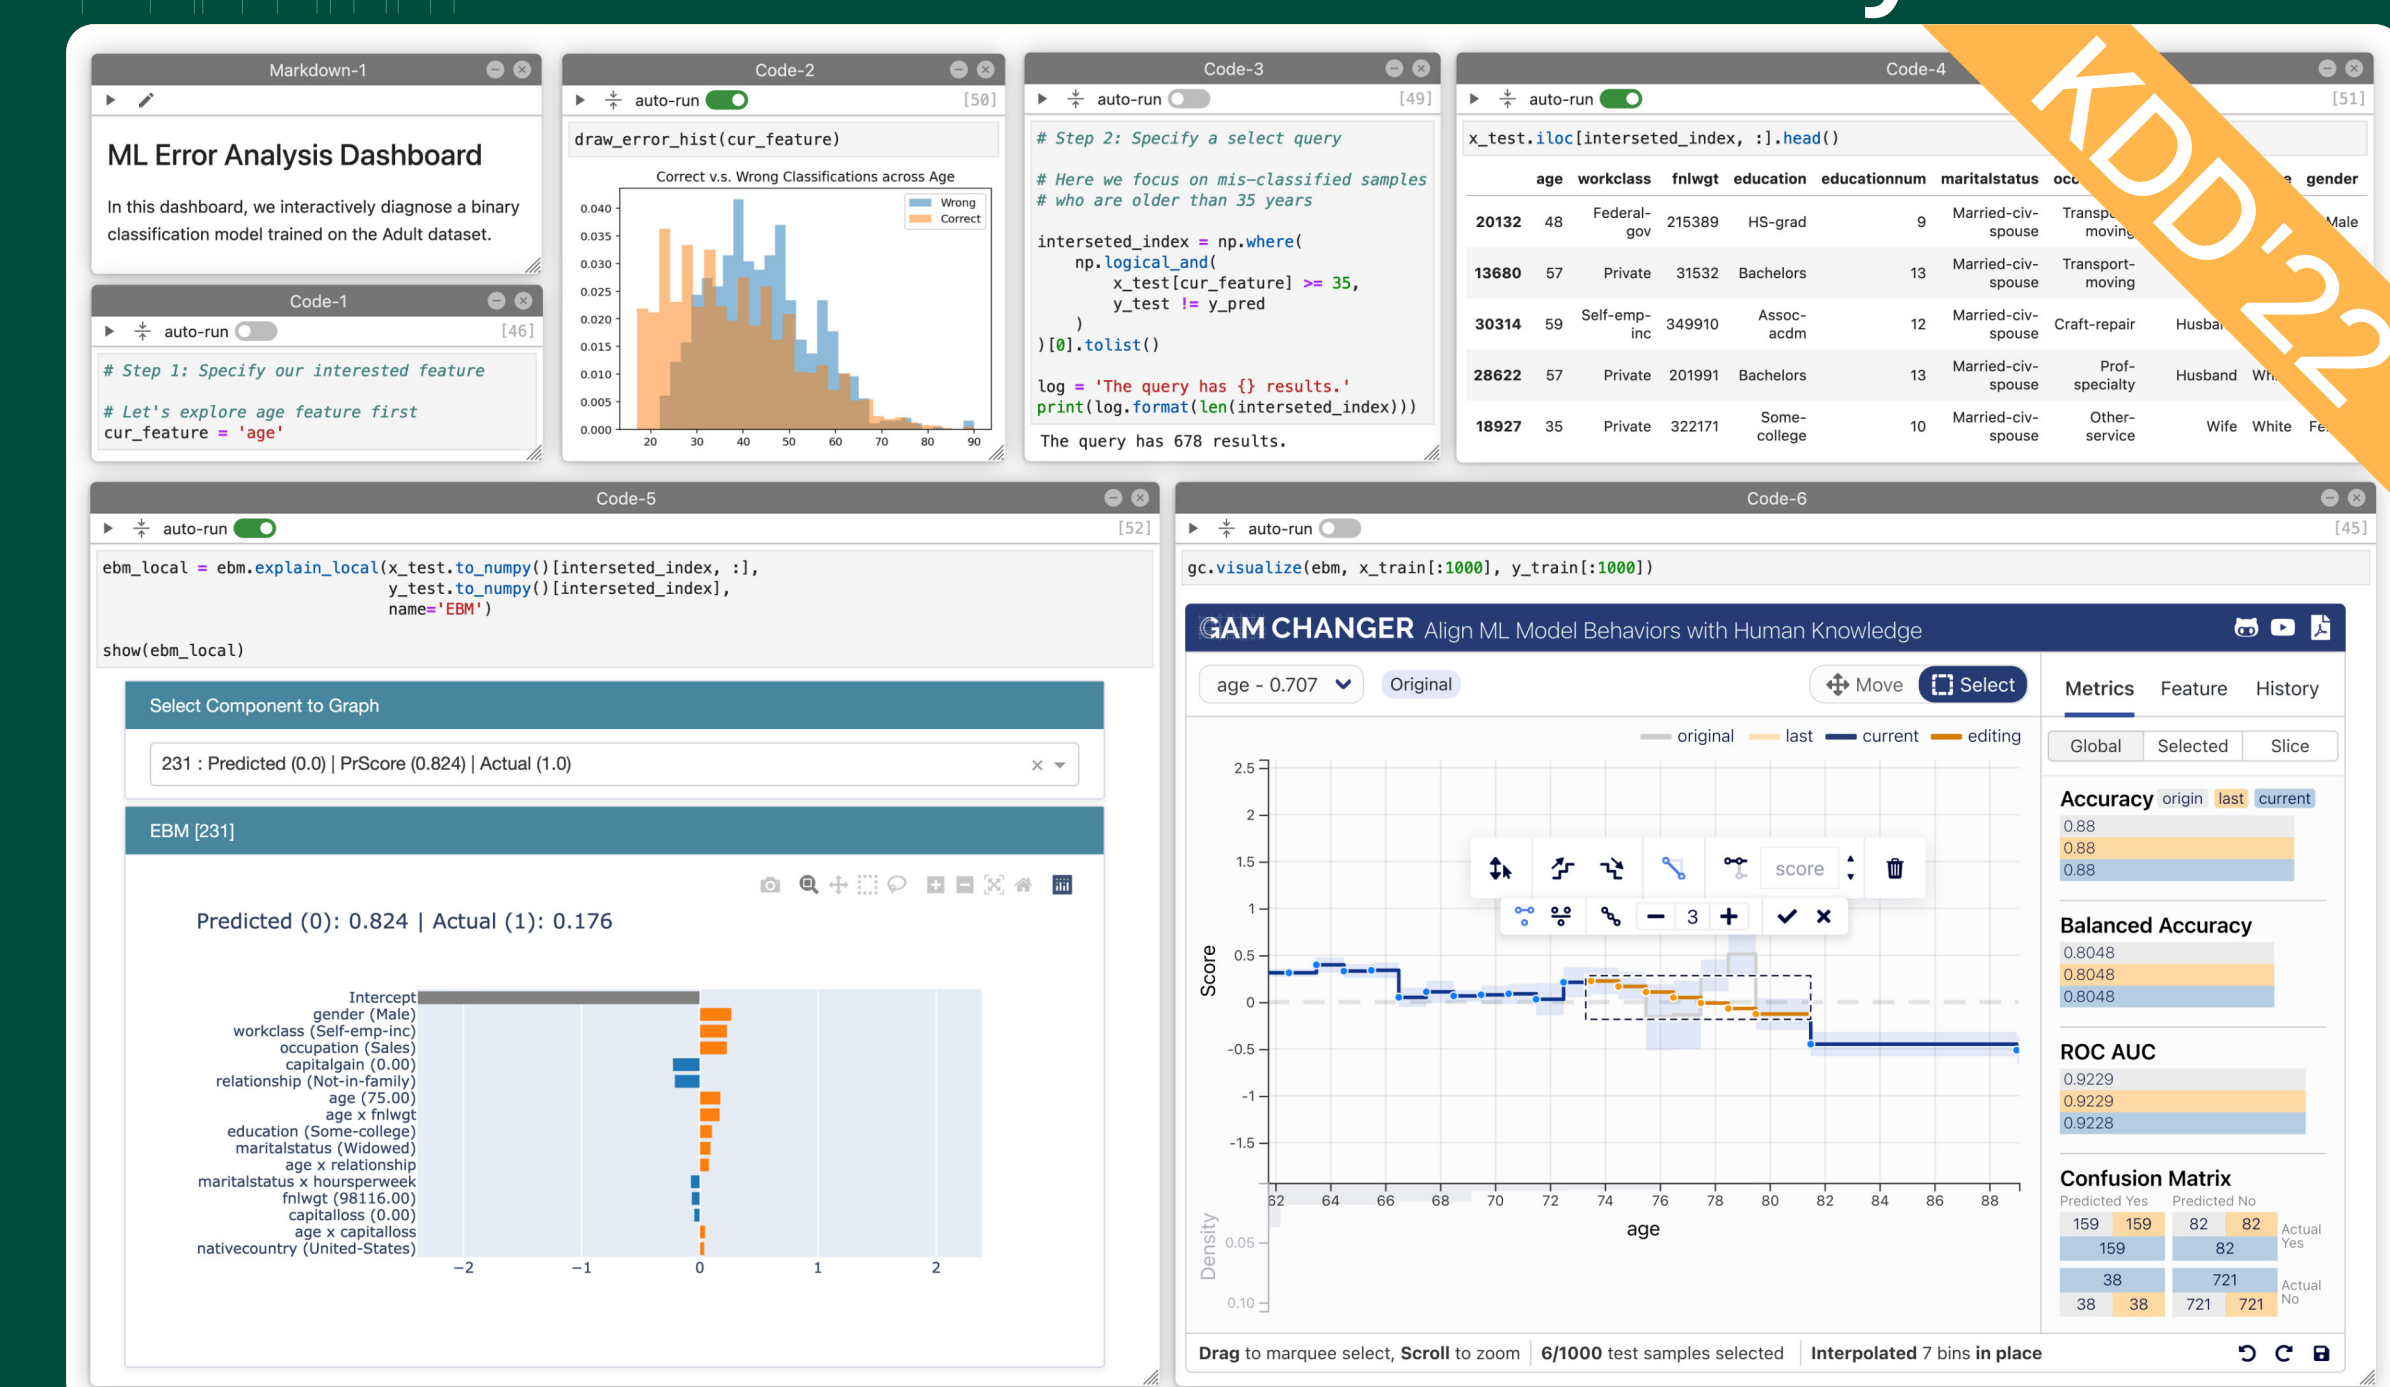

Detect and summarize ML biases

TimberTrek

Explore and curate decision trees

GAM CHANGER

Align ML behaviors with human knowledge
