1 Abstract

In Vivo / In Vitro - Trial 1.4 is an interactive new media installation that leverages AI to understand the moment of unconsciousness when a viewer blinks to ephemerally display generative and evolving embryonic imagery. The piece delves into the intricate interplay between human presence and machine perception, challenging the boundaries of control and autonomy, agency and absence, in our ephemeral entanglement with these vast evolving systems. By highlighting these fleeting moments of vulnerability, our work underscores the pervasive influence of AI on our everyday experiences, inviting a deeper reflection on our relationship with technology in this pivotal era of digital transformation.
