ABSTRACT

Please join Marvel Studios in presenting our episodic streaming series! The teams that worked on Moon Knight will take SIGGRAPH audiences through their VFX journeys as they discuss some of their shows' most innovative visual effects. Moon Knight – Steven Grant, a mild-mannered man who lives a mundane life, is plagued with blackouts and memories of a life separate from his own. But, after one fateful encounter, Steven learns that he shares a body with Marc Spector – a former mercenary and the ruthless avatar of Khonshu,

the Egyptian god of the moon and vengeance. With their enemies converging upon them, Steven must learn how to adapt to this revelation and work with his alter ego as other godly motives are at play.
