

Turing Galaxy: Visualizing Turing Award Laureates

Xinyuan Yan, Yifang Ma

Turing Galaxy visualizing the 74 Turing Award laureates using a galaxy metaphor.

Each ray represents the timeline of each laureate that indicates the year of birth, graduation, the first publication, awarding and death; name color indicates gender; orbits represent different research subjects;

Academic information of laureates is encoded as planets and nebulae.

Planet
Color: Eudication (**BS**, **MS**, **PHD**)
Area: productivity
Brightness: H-index
shaded area: productivity after winning
Email: xyan@cs.utah.edu, mayf@sustech.edu.cn

Nebulea consists of circles representing papers cited > 10
Big circle: First author paper;
Small circle: Non-first author paper;
Circle opacity: Citation number;
Nebulea divergence degree: Number of collaborators;
Circle order: Sorted by publication time from inside to outside
