

Communicating ML Architectures with Animation

Alec Helbling Polo Chau

An open-source Python  library to generate animations of ML algorithms.

Extensible  Pytorch-like  Animations 

GitHub
1.4k+ 

bit.ly/manimml

Step 1 Specify Architecture with Code

```
model = NeuralNetwork([
    ImageLayer(image),
    Convolutional2DLayer(num_feature_maps=1, feature_map_size=7),
    Convolutional2DLayer(num_feature_maps=5, feature_map_size=5, filter_size=3),
    FeedForwardLayer(num_nodes=3, activation_function="ReLU"),
    FeedForwardLayer(num_nodes=2, activation_function="Sigmoid"),
])
self.add(model)
```

Step 2 Play the Animation!

```
self.play(
    ForwardPass(model)
)
```

Coming Soon!

More model classes
e.g, decision trees

More algorithms, e.g.,
neural net weight updates

Animations for transformers,
diffusion models, etc.
